Now 100% Recycled Bond is The New Standard for Large Format Printing

Introducing the first reprographic company to standardize on FSC certified 100% recycled bond for large format copying & printing... for the same price as the 30% recycled bond.

Portland, Oregon March 15, 2010 – Willamette Print & Blueprint is proud to announce that it is the first reprographic firm to move from 30% recycled bond to 100% recycled bond as a standard for copying and printing plans for the architectural, engineering and construction industries.

FSC Certified 100% Recycled

The paper we are utilizing is 100% recycled media made from post-consumer waste. Our paper is sourced from an FSC certified paper distributor.

Same Price

We understand that during these tough economic times it is sometimes difficult to do the right thing and choose the most sustainable option. We have eliminated that concern by offering 100% recycled media at the same printing price as our previous 30% recycled media printing price.

Sustainable Practices

100% recycled paper for all large format black & white printing is one of the many ways we strive to focus on sustainability. Please see our website to learn more.

About Willamette Print & Blueprint:

Willamette Print & Blueprint (WP&B) is a full service reprographics company serving Oregon and Southwest Washington's design and building community. Founded in 1975 by Michael Amato, we utilize the latest digital technologies to provide a wide range of reprographics and graphic imaging services.
